EDGE EDGE

## Characteristics EDGE

Digital radio controls with fixed codes

Radio controls

433MHz AM fixed code

2<sup>20</sup> code combinations

Available channels 2-4-5-21

Range 100 - 150m

The range of radio controls is complete by receivers with self-learning code, extractable memory modules and programmable outputs.

## Product features EDGE230R4

Outdoor receiver (230Vac)

Receiver with four soldered relays, powered outputs (max. 5A 230V), which can be set to impulsive, ON/OFF or timer control (after you release the transmission button the output will remain active for 30 seconds).

Self-learning code function and programmable outputs in three different modes.

All weather box IP55.

> ULTIMATE CARDIN App

### GENERAL CHARACTERISTICS

Power supply	Vac/dc	230
Maximum electrical input	A	5
Operating temperature range	°C	-20...+55
Protection grade	IP	55
