## MANY MEETINGS

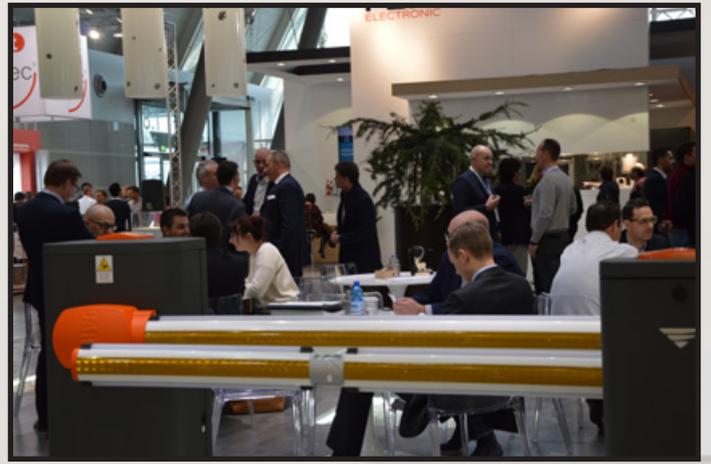

Cardin Elettronica decided to once again take part in the R+T trade fair in Stuttgart, Germany, this time for the 2018 edition. The company presented a series of new and revamped products through an innovative, state-of-the-art stand which proved to be an emphatic success with a great turn out,

crowning the dedication, commitment and work that has brought us to this point. We returned home very satisfied with the work and the very many positive moments that we passed together. Heartfelt thanks to all our customers, to our Gruppo Riello Elettronica partners and indeed to everybody who visited our stand and made it such a resounding success.
