AM NOIRE Noire

## Characteristics NOIRE

Digital radio controls with fixed codes / Rolling Codes

Radio controls

433MHz AM with fixed / rolling codes

2<sup>72</sup> code combinations

Available channels 2-4-5-21

Range 100 - 150m

The range of radio controls is complete by receivers with self-learning code, extractable memory modules and programmable outputs.

## Product features T10NOIRE

Radio-programmer for rolling shutters (230Vac)

The radio programmer with an inbuilt receiver and transformer for one single phase motor finds its best use in the command of automatic sun blinds and awnings.

The appliance may also be used to activate lighting systems with two bulbs (230V max. 500W) or light rolling grills and shutters.

Inputs for one opening and one closing command via cable.
